TRUCK INSPECTION REPORT

Client's Details: Lucy Smith

Date: 4/11/2025

Location: Seller's Address

State: NSW

Physical Inspectors: John

Technical Inspector: Alex

Reporter: Sean

Inspection Plan: **Truck Inspection**

VEHICLE DETAILS

Inspection Type: Visual Roadside- No Part Disassembly

Make: Mercedes Benz

Model: Actros

Year: 2013

Registration Number: LDQ...

State Registered: NSW

VIN: WDC1569522J2...

Odometer: 675111

Colour: White

Number of Doors: 2

Engine Type: Turbo Diesel

Transmission Type: Automatic

Three Technicians Have Been Involved in Making this Report!

1. **Physical Inspection** by One Senior Inspector at the Seller's Address
2. **PPSR Vehicle History** by Another, After the Inspection by Checking the VIN Online
3. **Report** by a Technical Reporter & Reviewer Checking the Work, Pictures, PPSR Report & More

This report is completely independent and free from guesswork. Last Check conducts only mechanical inspections and does not involve legal matters, odometer or VIN legitimacy checks, financial investigations, scam detection or any other non-mechanical aspects. If the vehicle is in good condition, the buyer will receive a green light and should complete all legal checks before proceeding with the purchase. We comprehensively check all major parts of the vehicle and ensure nothing important has been left behind however we do not or cannot check some minor items on roadside inspection such as alarm/security system, not possible to know if parts are original, minor cosmetics incl. Small scratches, dings, kerb rashes, cabin water penetration if not evident, dvd & cd player, car play, Bluetooth, phone chargers, front & rear sensors, automatic wipers, source of leaks unless visible, automated park, routers/brake pad thickness as we don't take the wheels off, lane departure, auto braking, reverse and brake lights, engine number which is on the body of the engine and is normally hidden, anything that is deemed risky when test drive. For more details, please check our terms and conditions. This report is different from roadworthy inspection and cannot be used instead.

This inspection is a visual roadside inspection on a third-party vehicle with no permission to open the parts as we have promised the vehicle owner. If you require a more detailed insight about something, after getting disassembly permission from the owner, you can take the vehicle to a workshop with a hoist facility to take parts apart if needed. It is the purchaser's responsibility to view the vehicle before settlement especially if there are concerns about minor cosmetic issues. Although we provide the largest number of pictures, viewing the pictures only can never be like viewing the vehicle in real life. If you are an interstate buyer and don't want to come and see the vehicle before purchase, you are naturally risking it especially since the vehicle has been left with the seller and anything can happen to it even if it has not been used much. For more details, please check our terms and conditions & FAQs

GENERAL ENGINE INFORMATION

Engine Runs / Sound: **SQUEAKY WHEN IDLING**

Engine Exhaust Smoke: **GOOD**

Hydraulic Tank / Hoses: **Hydraulic Fluid Leak Found**

PTO Performance: **Not Functional**

Engine Timing: **GOOD**

Engine Blow-by: **NO BLOW BY NOTED**

Engine Oil Condition: **POOR**

Engine Oil Level: **LOW**

Engine Bay Oil Leaks: **ENGINE OIL LEAK FOUND**

Extra Comments: **Engine oil leak is from the body of the engine block around the head gasket. It is deemed risky. Refer to the identified issues for more details.**

KEEP IN MIND: If you are buying the vehicle from a dealer in NSW and the vehicle meets the below criteria, you are eligible to receive a statutory warranty. Stat warranty applies to all vehicles younger than 10 years with an odometer of less than 160K and covers most repair costs after purchase for a limited time which is very valuable. These criteria can change at any time, so it is best to do your research before purchase. Hybrid battery charging capacity requires having physical access to the battery which is normally under the rear seats and legally cannot be done on the roadside because of the high voltage surge risks. If the plan you have chosen includes computer scanning, you will know if the battery needs immediate replacement. You can also take the vehicle to an authorised station to be aware of the hybrid battery life & max charging capacity.

VARIANT SPECIFIC PARTS

VARIANT SPECIFIC PARTS HAVE BEEN CHECKED BASED ON THE MAKE AND MODEL

Heavy vehicles and all other commercial vehicles are workhorses, each designed for a specific purpose. As a result, no two vehicles will have exactly the same parts and features. While they share many components with light vehicles, such as engines, transmissions, chassis, and suspension, some parts are entirely different. Depending on the make and model of the heavy vehicle, they may include components like **dual fuel tanks, PTOs, hydraulic hoses, air brakes, brake dryers, specialised cluster gauges, exhaust brakes, fifth wheels, chassis reinforcements, air suspension, tail lifters, Pantech, cranes, agitators, tow trays, winches, beacons, air horns, accessibility features, tachographs/speed limiters, and more.**

We inspect these items based on the specific make, model, and equipment of the heavy vehicle. For example, if you have a crane or concrete agitator truck, we'll inspect the truck itself as well as the crane & agitator components and their functionality. Some heavy vehicles require special licences to operate, such as EWP (Elevating Work Platforms), crane trucks, and agitators. In these cases, we'll need the operator to follow our instructions while we conduct the inspection and take notes.

Other vehicles, such as Pantech trucks, flatbed trucks, and buses, don't require special licences, and we can operate these systems with the owner's permission. If we identify any issues, they will be detailed in the "Identified Issues" section of the report. Additionally, commercial vehicles often show signs of common wear and tear, which are not considered faults and, therefore, not reportable. These can include minor windscreen cracks, stone chips, loose dashboard panels, exterior scratches and dents, small upholstery tears, or the absence of a proper service book.

However, all significant faults and issues that need attention before the vehicle can be used will be clearly listed in the "Issues" section at the bottom of the report. If you are buying a crane truck or similar vehicles, it's advisable to accompany the seller to a job site and perform some real liftings. While we check the performance, some issues only become apparent when the system is under load. Doing this will help ensure a safe investment for you. For buses or simpler types of trucks, this additional step is generally not necessary.

Please note that in prime movers and some truck types, many gauges only function when the vehicle is loaded or towing a trailer. If you decide to purchase, feel free to load the vehicle or attach a trailer to ensure you haven't missed any issues.

INSPECTION PICTURES

A LARGE NUMBER OF PICTURES HAVE BEEN TAKEN OF THE VEHICLE TO PROVIDE YOU WITH A CLEAR VIEW OF ALL DETAILS. PLEASE REFER TO THE SEPARATE PICTURE ALBUM IN YOUR REPORT LINK FOR THESE IMAGES.

Maintenance Schedule

48 months or 80,000km
(whichever occurs first)

Check

- Checked for, and completed all relevant Honda outstanding product updates

Inspect*

- All vehicle electronic operating systems in accordance with Honda's diagnostic procedures
- Steering gearbox, tie rod ends and boots
- Suspension components
- Drive shaft boots
- All fluid levels and condition of fluids
- Brake hoses and lines (including ABS)
- Exhaust system
- Fuel tank, lines and connections
- Front and rear brakes
- Headlight, taillight, indicator, reverse light and brakelight operation
- Inspect tyre condition and rotate tyres
- Valve clearance
- Drive belts
- Parking brake adjustment
- Headlight alignment
- Test drive (check all systems and controls)

Replace

- Engine oil
- Engine oil filter
- Air cleaner element
- Fuel filter
- Spark plugs

WE HAVE MADE IT EASY FOR YOU!

This Report Is Well-Organised & Easy to Understand, Requiring No Technical Knowledge. You Won't Need to Search Through Multiple Pages to Find Issues.

All Identified Issues Are Consolidated Below in One Place for Your Convenience. Additionally, We've Provided Recommendations Below the Issues to Help You Better Understand the Process of Buying a Used Vehicle, Including Potential Risks & Important Considerations.

WARNINGS

THIS TRUCK IS WRITTEN OFF

According to the PPSR record, this vehicle is a Repairable Write-Off. Its market and resale value will be lower than average, and it may be difficult to sell.

A full copy of the Vehicle History Report is attached for reference.

FINANCE IS OWING ON THE VEHICLE!!

Please note that there is finance owing on this vehicle. Any existing finance remains attached to the motorcycle and will transfer to the new owner upon purchase. We strongly recommend ensuring the seller clears the finance before full payment is made. Details of the financial encumbrance can be found in the collateral section of the attached PPSR report.

IDENTIFIED ISSUES

ALL ISSUES NEATLY LISTED IN ONE PLACE:

From A to Z, All Issues of the Vehicle Will Be Listed Here, Revealing the Severity, What Is Best to Do, Whether the Repairs Can Be Costly or Not, as Well as Recommendations on What to Do.

No Technical Knowledge Is Needed to Understand the Report. All Issues Will Be Listed in Simple Yet Accurate and Professional Language That Can Be Used to Get a Repair Quote.

At the End, the Report Will Contain a Personal Recommendation Tailored to the Condition of the Vehicle and What Is Best to Do. If the Vehicle Is Perfect, It Will Be Endorsed, and the Report Can Be Used in Future When Selling the Vehicle as an Endorsed Condition of the Vehicle at the Time of Inspection, Along with Hundreds of Pictures Which Will Add Value to the Vehicle and Make the Resale Process Easier.

Full Mechanical & Structural Inspection Including:

- **Engine Issues**
- **Gearbox & Clutch issues**
- **Oil Leaks**
- **Fluid Leaks**
- **Bodily Damages Needing Repair**

- Chassis Issues
- Suspension Problems
- Past Collisions
- Body Rust
- Oil Condition
- Fluids Condition
- Electronics Issues
- Interior & Exterior Issues
- Test Drive Concerns
- Safety Concerns
- Tyres
- Brake System
- Lights
- And Everything Else Based on the Vehicle Type

This Report Will Be Issued After an Initial Phone Call With Your Inspector, Who Will Explain Everything to You, Answer Your Technical Questions, and Guide You Toward Making the Best Decision.

UNSURE OF WHAT TO DO?

WE DO NOT LIMIT YOUR CALLS AFTER THE INSPECTION!

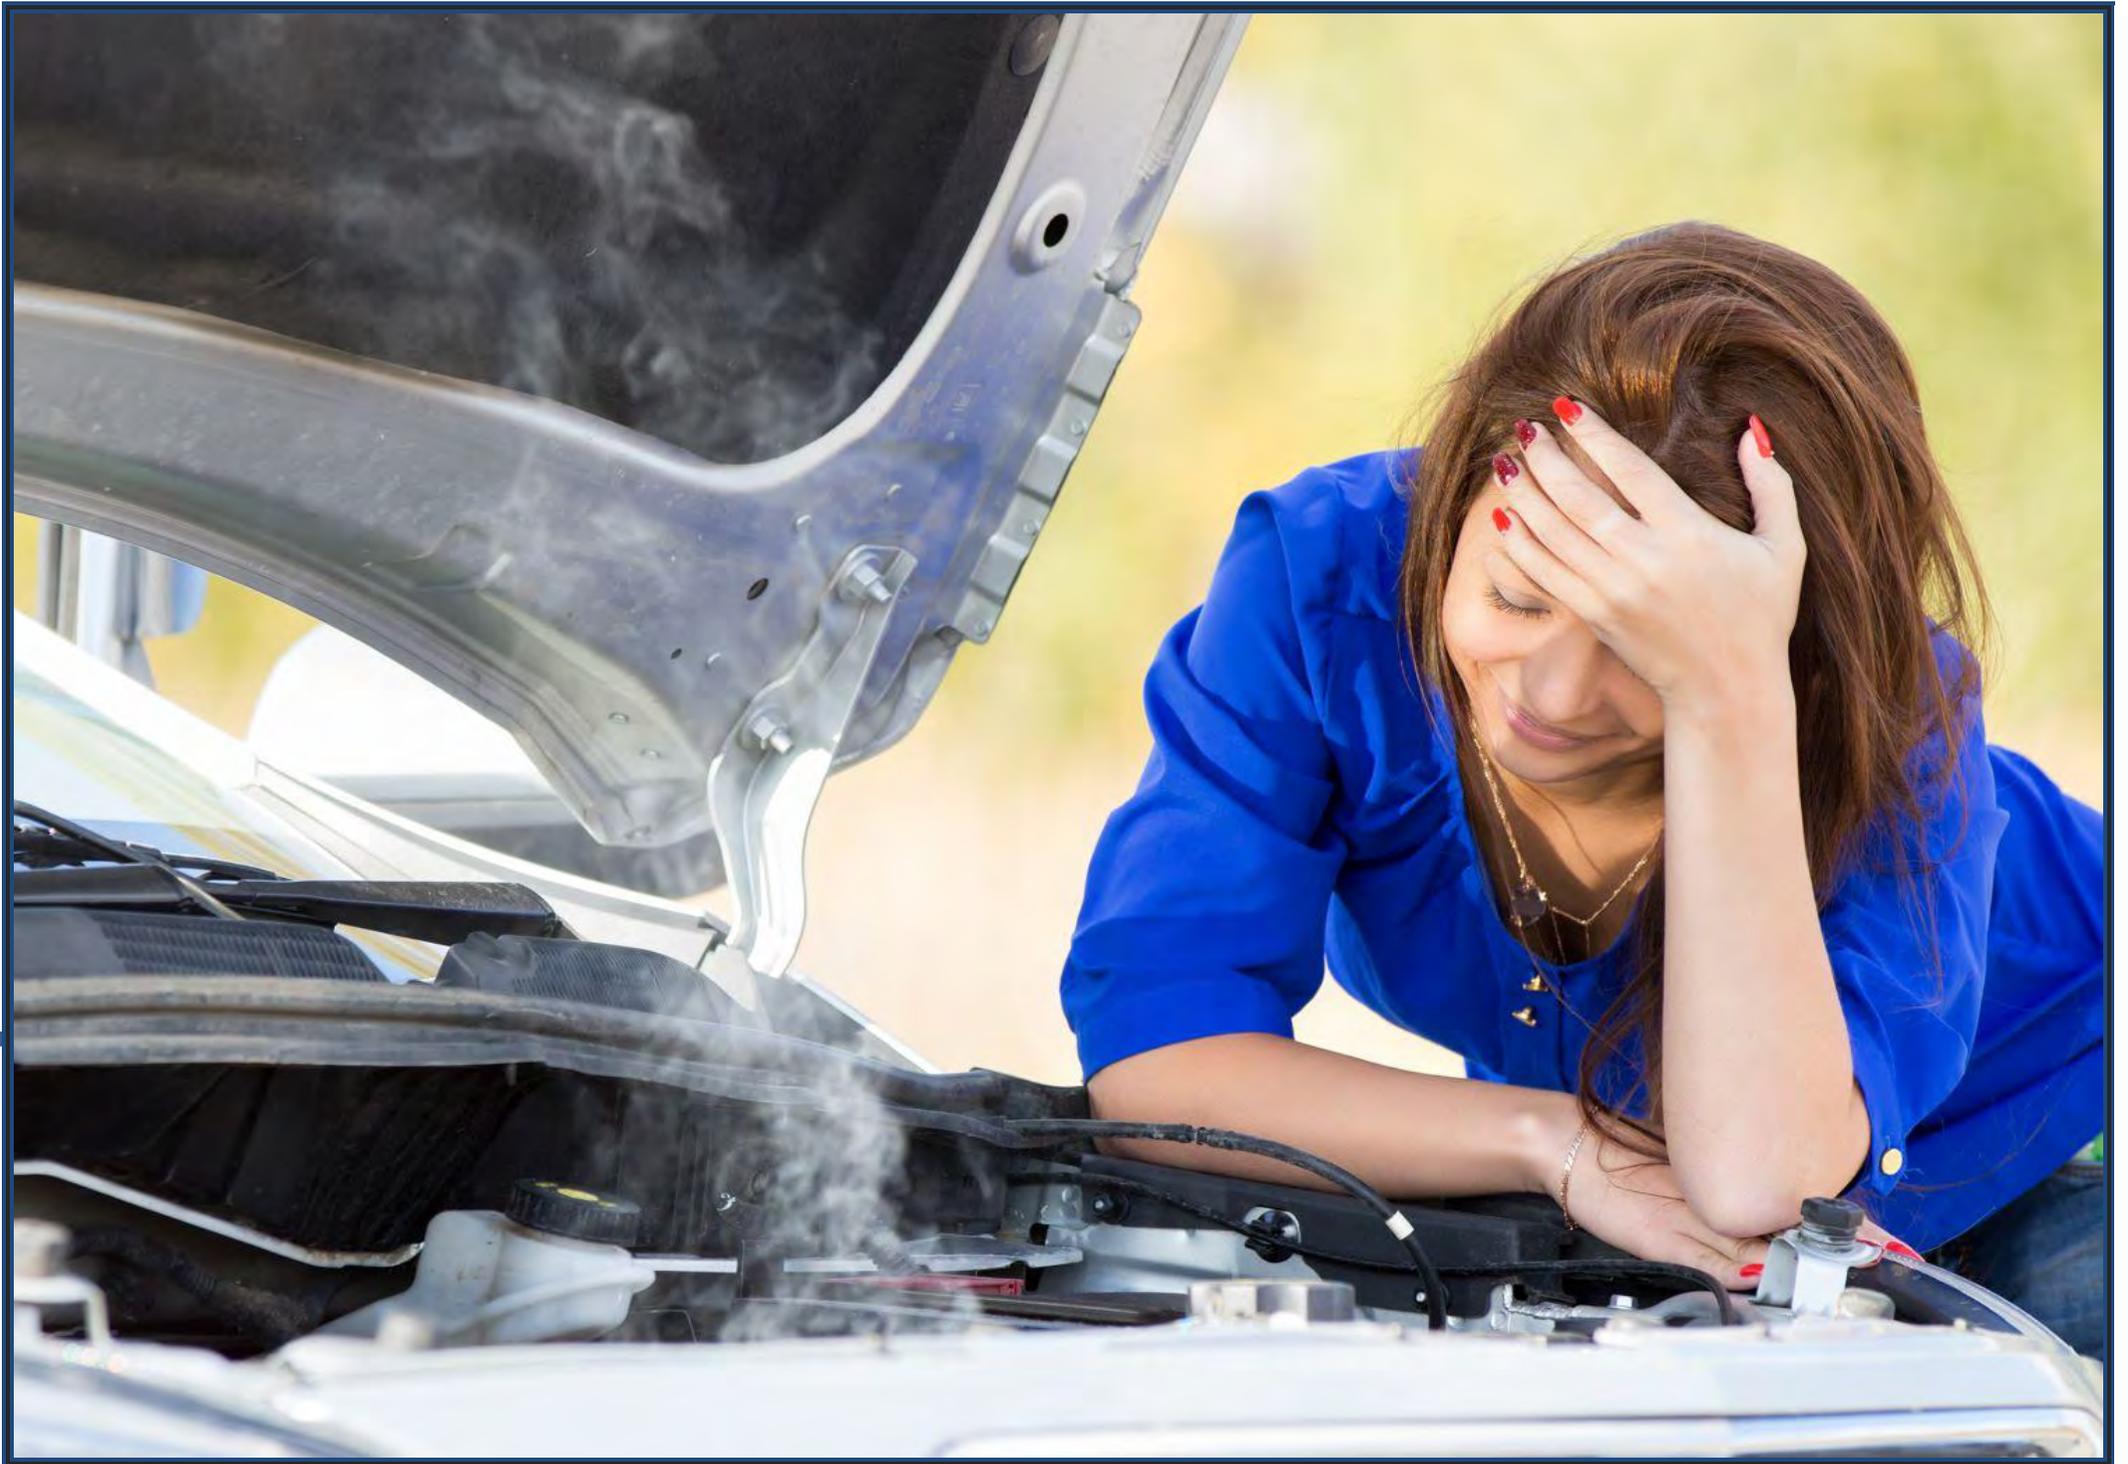

WE'RE HAPPY TO KEEP HELPING YOU AND BE YOUR PROFESSIONAL ADVISER UNTIL YOU FINALISE YOUR PURCHASE OR HELP YOU CHOOSE ANOTHER VEHICLE.
